

## Key Features

### Display

The B-250 cap press is a manual machine which features a digital timer (optional analog) that is adjustable up to 99 minutes and 59 seconds, shows countdown on readout, beeps after elapsed time, and resets when the open and close handle (with full range pressure adjustment) is raised.

### Design

The innovative bottom cap hold-down stretches the cap out, holding it snug to the lower (rubber covered) platen. A Teflon blanket is suspended between the upper and lower platen to hold the transfer (or lettering) in place before the heating element is locked down.

## Overview

The HIX B-250 is a super portable hat press that's lightweight enough to bring to shows. The transfer hold down blanket ensures transfers don't shift.

## Specifications

|                 |                       |                        |               |
