

Key Features

Clamshell

Close the lid and walk away. Set up another job, or grab a soda. With the HIX S-450 Auto Release Heat Transfer machine, you have worry-free operation. When the job is finished, the clamshell lid pops open and stops the heat transfer process – but the upper platen stays hot and set to your pre-set temperature. It's ready to work when you are!

Display

Easy integrated digital time and temperature settings – Touch-screen controller allows simple dialing in of time and temperature. The current pressure is displayed on the touch-screen display each time the press closes.

Design

The S-450 now comes with a free Splitter Stand, allowing for the operators to “dress” the shirt easily over the lower platen, keeping the back of the shirt positioned underneath the machine and away from the heat and compression.

Overview

The HIX S-450 utilizes an exclusive electronically activated mechanical latch release mechanism with a gas shock assist to help enhance and support your operations. No compressor required. Free operation, reduce fatigue, and increase productivity – all with one press.

Specifications

Dimensions	21" W x 33" D x 23" H	Heat Platen Dimensions	15" x 15"
Weight	-- lbs	Watts	1750W and 2000W
Shipping Weight	95 lbs	Maximum Substrate	1/2"
Volts	120V and 220V		
Amperage	14.5 A and 10A		

100% Made in the USA – HIX has its own 110,000 sq ft manufacturing facility with its very own fully integrated aluminum foundry, CNC mill operation, welding, metal forming, wiring, fabrication, assembly, and packaging departments.
