

SPLITTER STAND

Key Features

Design

It works well for garments where pockets, zippers, or other assemblies cannot allow for a flat surface when laying fully onto the lower platen. The Shirt Splitter Stand can be ordered at the time of a new transfer machine purchase, or later to retrofit existing equipment. It fits only the HT400/600, S450/650 models built after 2012, and is equipped with a folded sheet metal base.

Specifications

Dimensions	20"W x 11.75"D x 5.125"H
Shipping Weight	8 lbs

Overview

The HIX Shirt Splitter Stand is the handiest device for printing multiple panels on the same garment. The HIX Shirt Splitter Stand is built in a cantilever profile, providing the transfer machine with the capability to press only one side of a shirt while its other side hangs safely underneath the lower platen.
