

# SwingMan 20E

## Key Features

### Press

The SwingMan 20E is one of the most reliable swing-away heat transfer presses on the market. Engineered with a sturdy steel design and the ability to apply all types of transfers onto items up to 1-3/4" thick, you cannot find a better, more reliable press at this price level, especially in the sublimation category.

### Design

Right swing-away design. The swing-away design gives straight down pressure needed for doing tiles, plaques, and other items. Separate digital timer included. This is a manual timer, so when the beeper goes off and you stop it, the timer will automatically reset. Full range temperature control to 450°F. There is no guesswork about temperature. You dial it in like you would on an oven. The 450°F temperature will transfer anything currently on the market.

## Overview

The SwingMan 20E is the best in its class for a 16" x 20" platen surface and is the number 1 choice for most start-up businesses. With unlimited application options ranging from youth sizes to extra large garments, transfer applications are virtually unlimited.

## Specifications

Dimensions	34" W x 22" D x 20" H	Heat Platen Dimensions	16" x 20"
Weight	lbs	Watts	1750W and 2000W
Shipping Weight	113lbs	Maximum Substrate	1 3/4"
Volts	120V and 220V		
Amperage	14.5 A and 10A		

**100% Made in the USA – HIX has its own 110,000 sq ft manufacturing facility with its very own fully integrated aluminum foundry, CNC mill operation, welding, metal forming, wiring, fabrication, assembly, and packaging departments.**
